Security Update - Ex Libris Primo VE Log-in Security Vulnerability - September 05, 2021

Overview

A vulnerability in Ex Libris' Primo VE has come to Ex Libris' attention and has been eliminated. The vulnerability affected the login flow only for customers using the Consortia setup. Until the vulnerability was eliminated, a motivated user holding certain additional identifying information of other users within the same consortium could have exploited it to view certain contact information of, and list of books borrowed by, such other users.

Effective Security Severity Level

High

Affected Systems

Ex Libris' Primo VE

Tests and Certifications

The fix for this vulnerability has been developed, tested, installed and certified for the Ex Libris Primo VE product.

Action Taken by Ex Libris for Cloud Systems

• Ex Libris has deployed the fix to all cloud environments

• No action is required by Primo VE customers

Exploitation and Public Announcements

The Ex Libris Security Incident Response Team (SIRT) is not aware of any public announcements or malicious use of the vulnerability that is described in this advisory.
